

SeaPort

Prime Company: EdgeTech Consulting, Inc.

Contract Name: SeaPort Enhanced

Contract Number: N00178-08-D-5410

Issued by: Naval Surface Warfare Center

SeaPort Overview:

SeaPort Enhanced (SeaPort-e) has made electronic procurement of Engineering, Financial, and Program Management support services a reality. Using SeaPort-e, the Navy Virtual SYSCOM (VS) Commanders (NAVAIR, NAVSEA, NAVSUP and SPAWAR) has adopted an integrated approach to contracting for support services. The SeaPort-e portal provides a standardized means of issuing competitive solicitations amongst a large & diverse community of approved contractors, as well as a platform for awarding & managing performance-based task orders. This unified approach allows SeaPort-e service procurement teams to leverage their best work products, practices, & approaches across the Navy's critical service business sector.

Simply stated, SeaPort-e provides a faster, better, & more cost-effective means of contracting for professional support services.

Prime Company Overview:

EdgeTech Consulting is a global Information Technology Staffing and Consulting firm. We specialize in providing innovative and highly skilled professional IT consultants having the expertise needed to assist our clients in meeting their business and technical needs.

With over 20 years of consulting experience, EdgeTech offers our clients the business and technical expertise needed to accomplish their project objectives. We can quickly provide our clients with the technical resources needed to augment their project teams when managing high customer expectations,

unreasonable project deadlines, or simply to add extra "horsepower" to their project team.

Our consulting professionals can provide project management and leadership expertise to assist in keeping projects on-track and within budget. In addition, we excel at locating and retaining technical consultants who specialize in implementing "bleeding-edge" technology. These consultants can assist client project teams in overcoming the "hurdles" so often encountered when implementing new technology.

Our deep breadth of application experience includes full life-cycle systems development in virtually all functional areas of business, including e-business, sales and marketing, data warehousing, customer relationship management, shipping and distribution, finance, materials management, accounting, inventory management, information and document management, human resources, legal, and more.

EdgeTech is committed to providing the highest level of service possible. Our methodical approach to systems development and our strong commitment to customer satisfaction allow us to make this happen.

Team Member Overview:

VOLT Information Sciences, Inc.

Volt Information Sciences Inc. (NYSE: VOL) is EdgeTech's Teaming Partner on the SeaPort-e initiative. Volt's family of divisions, subsidiaries, and joint ventures now span the globe, with offices across the United States, Canada, Europe and South America. Volt is listed as a Fortune 1000 company and is traded publicly on the New York Stock Exchange. The company's annual revenues exceed two billion dollars.

Volt business segments are interrelated from the viewpoint of key ingredients such as skill sets, customers, technologies and marketplaces. Working together, these businesses add synergistic value to one another and in turn, to their customers. Capabilities and accomplishments in each one of Volt businesses enhance the opportunity for success in the others. Put simply, Volt's unique combination of attributes promotes success! Volt has over 300 company-owned & operated locations around the world, has offices in every SeaPort Zone, and has employees in every state in the United States.

Twin Bridge Consulting, an EdgeTech Teaming Partner, is a woman-owned IT consulting firm, focused on strategy, architecture and planning. Twin Bridge's typical customer is a large company's CIO, CTO or other IT senior executive, who is looking for help on overall strategy and planning for either the entire IT organization or a very large project within the organization.

Twin Bridge's managing partners are former IT executives for Fortune 50 firms. Twin Bridge has been in business in the commercial market since 2000, with multiple successful engagements in healthcare, high tech, financial, and utility industries as well as with major research institutions.

Twin Bridge has designed its practices around a model of IT effort called "the missing middle." The missing middle refers to the set of key technology, planning and organizational decisions that are necessary to transform a high level business goal into an implemented IT project. Twin Bridge's customers have found that the missing middle decisions are crucial in ensuring successful projects which serve their customers needs.

Quality Assurance Program:

EdgeTech follows the ISO 9001 standard of Quality Assurance, which is based on the following eight principles:

- Customer-focused organization: Our objective is to focus on the success of our clients, and our success will follow.
- Leadership: Our management team believes in hiring the best and the brightest, and empowering them to lead the organization to great heights.
- Involvement of people: Openly shared and clearly defined goals and objectives leads to an involved and engaged effort.
- Process approach: A systematic and methodical approach is imperative, if consistent, successful results are expected.
- Systemic approach: Managing a system of interrelated processes to a given objective contributes to efficiency. Integrating and aligning processes leads to improved results.
- Continual improvement: Is a constant objective of the organization, leading to improvements in overall efficiencies and performance.
- Factual approach to decision making: Effective decisions are based on the logical analysis of reliable data and information.

- Mutually beneficial supplier relationships: Establishing mutually beneficial relationships with suppliers enhances the ability of both organizations to create value.
